Eligible Professional Attestation Worksheet for Stage 2 of the Medicare Electronic Health Record (EHR) Incentive Program

The Eligible Professional Attestation Worksheet is for eligible professionals in Stage 2 of meaningful use and allows them to log their meaningful use measures on this page to use as a reference when attesting for the Medicare EHR Incentive Program in the CMS system.

For each objective with a percentage-based measure, certified EHR technology must include the capability to electronically record the numerator and denominator and generate a report including the numerator, denominator, and resulting percentage for these measures. However, eligible professionals may use additional data to calculate numerators and denominators and to generate reports on all measures of the core and menu set meaningful use objectives. In order to provide complete and accurate information for certain of these measures, eligible professionals may also have to include information from paper-based patient records or from records maintained in uncertified EHR technology.

Eligible professionals can enter their meaningful use criteria in the blue boxes. Each measure's objective is included to help eligible professionals enter the correct criteria. Certain measures do not require a numerator and denominator, but rather a yes/no answer, and are marked as such. Measures with exclusions have the exclusion description listed in the measure information section.

Note: Exclusions do not count towards the 3 menu objectives needed to successfully demonstrate meaningful use. Eligible professionals cannot claim an exclusion for a menu objective if there are other menu objectives they can meet.

Eligible professionals must report on the following:

- 1. All 17 of the core measures
- 2. 3 out of 6 of the menu measures
- 3. 9 out of 64 of the clinical quality measures (CQMs) covering at least 3 National Quality Strategy domains

Reporting Period: For Stage 2, the reporting period must be the entire calendar year.

For 2014 only: Because all providers must upgrade or adopt newly certified EHRs in 2014, all providers regardless of their stage of meaningful use are only required to demonstrate meaningful use for a three-month (or 90-day) EHR reporting period in 2014:

- Medicare eligible professionals beyond their first year of meaningful use must select a threemonth reporting period fixed to the quarter of the calendar year.
- Medicare eligible professionals in their first year of meaningful use may select any 90 day reporting period
- Medicaid eligible professionals can select any 90-day reporting period that falls within the 2014 calendar year.

Meaningful Use Core Measures- must fill out all 17 core measures

#	Measure Information	Measure Values
1	Objective: Use computerized provider order entry (CPOE) for medical radiology orders directly entered by any licensed healthcare profess orders into the medical record per state, local and professional guide Measure: More than 60 percent of medication, 30 percent of laboral radiology orders created by the EP during the EHR reporting period a Exclusion: Any EP who writes fewer than 100 medication, radiology, during the EHR reporting period.	ional who can enter elines. itory, and 30 percent of are recorded using CPOE.
	Does this exclusion apply to you?	Yes 🔿 No 🔿
	Numerator 1 (Medication): Number of orders in the denominator recorded using CPOE.	
	Denominator 1 (Medication): Number of medication orders created by the EP during the EHR reporting period.	
	Numerator 2 (Radiology): Number of orders in the denominator recorded using CPOE.	
	Denominator 2 (Radiology): Number of radiology orders created by the EP during the EHR reporting period.	
	Numerator 3 (Laboratory): Number of orders in the denominator recorded using CPOE.	
	Denominator 3 (Laboratory): Number of laboratory orders created by the EP during the EHR reporting period.	
2	 Objective: Generate and transmit permissible prescriptions electron Measure: More than 50 percent of all permissible prescriptions, or a by the EP are queried for a drug formulary and transmitted electron Exclusion 1: Any EP who writes fewer than 100 permissible prescriptions reporting period. Exclusion 2: Any EP who does not have a pharmacy within their organ pharmacies that accept electronic prescriptions within 10 miles of the start of his/her EHR reporting period. 	all prescriptions, written ically using CEHRT. tions during the EHR anization and there are no ne EP's practice location at
	Does exclusion 1 apply to you?	Yes No
	Does exclusion 2 apply to you?	Yes No O
	Numerator: Number of prescriptions in the denominator generated, queried for a drug formulary and transmitted electronically using CEHRT.	
	Denominator: Number of prescriptions written for drugs requiring a prescription in order to be dispensed other than controlled substances during the EHR reporting period or number of prescriptions written for drugs requiring a prescription in order to be dispensed during the EHR reporting period.	

#	Measure Information	Measure Va	lues		
3	Objective: Record the following demographics: preferred language,	sex, race, eth	nicity, date		
	of birth. Measure: More than 80 percent of all unique patients seen by the E	D have dome	raphics		
	recorded as structured data.	P nave demog	graphics		
	Numerator: Number of patients in the denominator who have all				
	the elements of demographics (or a specific notation if the patient				
	declined to provide one or more elements or if recording an				
	element is contrary to state law) recorded as structured data.				
	Denominator: Number of unique patients seen by the EP during				
	the EHR reporting period.				
4	Objective: Record and chart changes in the following vital signs: heig		-		
	age limit); blood pressure (ages 3 and over); calculate and display bo plot and display growth charts for patients 0-20 years, including BMI		x (BIVII); and		
	Measure: More than 80 percent of all unique patients seen by the E		pressure (for		
	patients age 3 and over only) and/or height and weight (for all ages)				
	data.				
	Exclusion 1: Any EP who sees no patients 3 years or older is excluded from recording blood				
	Exclusion 1: Any EP who sees no patients 3 years or older is excluded		ing blood		
	pressure.				
	pressure. Exclusion 2: Any EP who believes that all 3 vital signs of height/lengt	h, weight, and	d blood		
	pressure. Exclusion 2: Any EP who believes that all 3 vital signs of height/lengt pressure have no relevance to their scope of practice is excluded fro	h, weight, and m recording t	d blood hem.		
	pressure. Exclusion 2: Any EP who believes that all 3 vital signs of height/lengt pressure have no relevance to their scope of practice is excluded fro Exclusion 3: Any EP who believes that height/length and weight are	th, weight, and m recording t relevant to th	d blood hem.		
	pressure.
